Hamid Fattahi

Front-end Developer NextJs

Tehran, Tehran Province, Iran

Experience

Aldy

Frontend Developer

January 2025 - Present (1 year)

Tehran Province, Iran

Frontend Developer at Aldy, responsible for building and scaling complex interfaces across marketplace, ERP, logistics, and payment domains. Key deliverables include:

ERP/Backoffice panels for DailyMarket and WallMarket, covering operational workflows and management tooling.

Logistics PDA applications for store fulfillment, supporting online and offline sales scenarios and in-store execution.

Migration and expansion from aldy.ir (deprecated) to aldyshop.ir, a complete multi-vendor e-commerce platform with fully featured Admin and Seller panels.

Frontend contributions to WPG, enabling online/offline payment systems, and fintech products including Gholackvam loans, BNPL, and multi-purpose wallets aligned with modern Iranian fintech patterns (e.g., DigiPay/SnappPay-like experiences).

DESNA CO

Frontend Developer

December 2023 - Present (2 years 1 month)

Tehran, Tehran Province, Iran

Frontend Developer at Desan, shipping map-centric B2B apps and custom e-commerce platforms for enterprise retail and FMCG workflows. Key projects:

BAT Route Plan Visitor app: clustered stores and scheduled sales-team visits with map-based planning; implemented routing/territory logic to support large-scale field execution.

BAT Survey + Gamification app: store survey workflows with gamified incentives (discount/bonus mechanics) and product-education modules to improve adoption and sales performance.

Unilever B2B (drugstore ordering): ordering experience for retailers to request inventory from Unilever, optimized for repeat purchases and operational reliability.

RoyalJeans: custom website + fully customized admin panel; implemented B2B and B2C shopping flows for apparel commerce.

GhajariFood.com: catering platform with internal delivery management, polygon-based delivery zone pricing calculator, and sales operations tooling (hot/cold sales).

Niklink Agency

Wordpress Developer

November 2019 - December 2020 (1 year 2 months)

Iran

Web Developer (WordPress) at Niklink Agency, responsible for designing and building responsive websites for enterprise industrial clients and agency customers. Key contributions:

Built WordPress websites for Nik Yazd Holding and subsidiaries: PPNY (petro-refinery company), Nikpu (polyurethane production), and Nikbaspar (municipal/building sewage fittings).

Implemented pixel-accurate UI from Figma designs, collaborating closely with the design team for consistent UX and branding.

Partnered with the SEO team to execute on-page SEO, improve content structure, and handle technical SEO tasks (metadata, heading hierarchy, internal linking, performance basics).

Delivered additional client websites across different industries, owning implementation from development to launch.

kiasoren

Full-stack Developer

August 2016 - December 2019 (3 years 5 months)

Tehran, Iran

Software Intern at Kiasoren, working in a small, hands-on team environment under the mentorship of Mr. Nadernia. Focus areas:

Programming fundamentals: algorithms, flowcharts, structured problem solving

Web development: WordPress development, front-end foundations

Backend basics: PHP fundamentals, SQL and database concepts

Intro to DevOps and software delivery: environments, deployment concepts, and overall system design awareness

This internship gave me a strong understanding of the software development lifecycle and prepared me for production work in agency and product teams.
