👤 PROFILE

A skilled and results-oriented React Native Developer with approximately 4 years of experience in building robust and scalable cross-platform mobile applications. Proven ability to design and implement features focusing on scalable architecture, performance optimization, and modern state management.

Expertise in integrating REST APIs, utilizing technologies like React Native, TypeScript, Expo, Firebase, and Supabase. Adept at incorporating real-time features, map functionalities, and ensuring clean, maintainable code for long-term project health.

Actively expanding front-end capabilities through ongoing work with React for web development. Seeking to leverage expertise to contribute to innovative mobile solutions.

📁 PROFESSIONAL EXPERIENCE

Mobile Developer at Aldy

08/2024 – present | Tehran, Iran

- Contributed to the development of a scalable Super App with multiple integrated applications:
 - **E-commerce Application:** Built core shopping and delivery flows with map integration, while achieving noticeable improvements in UI responsiveness through rendering and list optimizations.
 - **Loan Wallet Application:** Implemented reliable loan request and management flows, leading to a measurable reduction in user-reported inconsistencies and edge-case errors.
- Developed internal organization features for a mobile application, prioritizing usability and maintainability.
- Built features involving QR scanning and real-time communication using Socket.io.
- Contributed to grocery and taxi application modules, supporting end-to-end mobile product development.
- Integrated Firebase and Supabase services for authentication, storage, and backend-connected workflows.
- Implemented map-based features utilizing Google Maps and Mapbox.

Mobile Developer

01/2025 – 05/2025 | Turkey

- Contributed to a new mobile application and participated in bug fixing for an existing product.
- Supported ongoing feature development in a remote, part-time collaboration.

Mobile Developer at MelkeTabriz

12/2021 – 12/2023 | Tabriz, Iran

- Developed a real-estate mobile application using Expo.
- Built an admin-panel-oriented mobile experience tailored for real-estate workflows.

- Focused on structured mobile delivery, emphasizing maintainability and product stability.

Mobile Developer at Sharestoon

05/2022 – 12/2022 | Tehran, Iran

- Developed a mobile application using the Bare CLI.
- Supported mobile feature implementation in a part-time remote setting.

TECH STACK

Mobile (React Native, JavaScript (ES6+), TypeScript, Expo) | **State Management** (React Query, Zustand, Redux Toolkit) | **Backend & APIs** (REST APIs, Firebase, Supabase, Socket.io) | **Maps** (Google Maps, Mapbox) | **Tools** (Git, Axios)

CORE STRENGTHS

Performance Optimization • Scalable Mobile Architecture • Clean & Maintainable Code • Cross-Platform Development • API Integration • Modern State Management • Debugging & Problem Solving

PROJECTS

React Native Components

12/2024 – present

- This repository contains common React Native components such as various buttons (radio button, checkbox button, etc.), inputs (simple input, safe input, input with icon, etc.), and so on. All components were developed with TypeScript [↗](#)

React Native State Management

10/2023 – 03/2024

- This repository focuses on managing states in React Native. The program demonstrates the use of four common state management tools, using synchronous (Sync) and asynchronous (Async) implementation methods. [↗](#)

Monkey Food

10/2023 – 10/2023

- UI-UX Figma [↗](#)
- This food delivery app was developed using Expo and TypeScript. Its user interface is prefabricated, and there is no backend. [↗](#)

EDUCATION

Master of Computer Engineering

2014 – 2017 | Shabestar, Tabriz, Iran

Shabestar Azad University(IAU)

Bachelor of Computer Engineering

2011 – 2014 | Tabriz, Iran

Khaneh Karagar Tabriz
